

## BLOCK 2 - P.14 - Descriptions and Supporting Text Used for other Entities with the same purpose

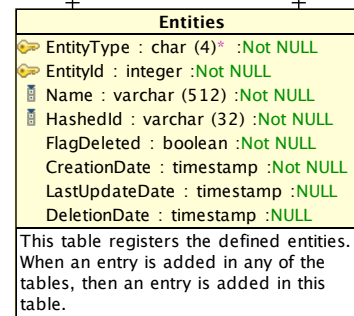

## BLOCK 2 - P.16 - Links to supported resources Used for other Entities with the same purpose

The Master tables that can be mapped to an Entity are:

- Products (Entity type PROD)
- Collections (Entity type COLL)
- Subjects (Entity type SUBJ)
- Contributors (Entity type CONT)
- Imprints (Entity type IMPR)
- Publishers (Entity type PUBL)
- (static) Pages (Entity type PAGE)

The tables named Entity\* in this section are shared by multiple main Entities. The idea being that much code can be shared.
